## <u>RhD Negative Pregnant Women & RhD Immunoglobulin-VF:</u> Anti-D Prophylaxis Pathway in the Community

Pathway assumes ≥10 weeks gestation, no pre-existing Anti-D antibodies. Routine Prophylaxis is given in addition to Anti-D given for sensitising event.

## **Routine Prophylaxis Pathway**

\* Order blood tests at any provider including Dorevitch Frankston Hospital Level 3 (9784 7047)

\*\* Anti-D can be ordered from Dorevitch/Blood Bank Frankston Hospital Level 3 (9784 7047) on any pathology form but form MUST state

- Name & DOB
- Gestation
- If mother has had Anti-D during the pregnancy (date, time and dose)

\*\*\* Anti-D can be collected by woman or family members with patient consent. Anti-D ideally stored at 2° - 8°C. Do not freeze. Protect from light.

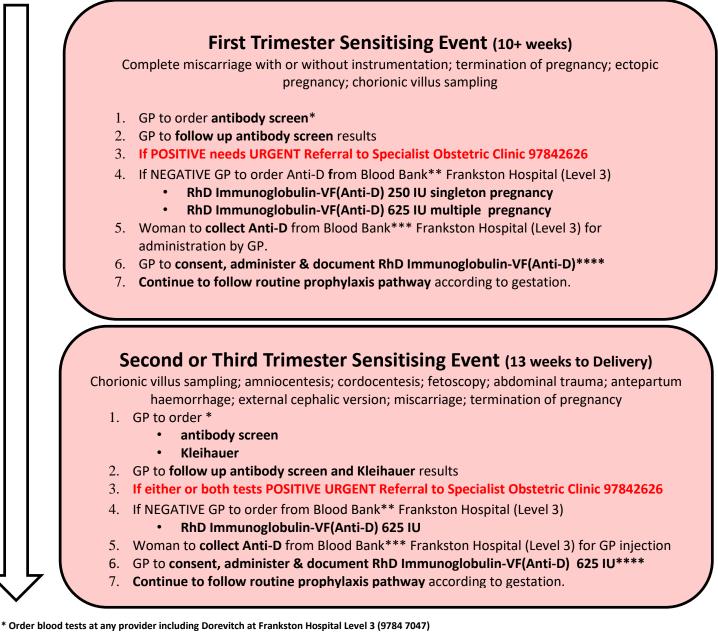

\*\*\*\* The batch number of every vial of human immunoglobulin administered must be recorded. Preferred document is Peninsula Health Anti-D Patient Consent & Administration Form MR553120 with copy to be kept in VMR (Victorian Maternity Record) and in GP medical records.

## <u>RhD Negative Pregnant Women & RhD Immunoglobulin-VF:</u> Anti-D Prophylaxis Pathway in the Community

Pathway assumes ≥10 weeks gestation, no pre-existing Anti-D antibodies. Routine Prophylaxis is given in addition to Anti-D given for sensitising event.

## **Sensitising Events Pathway**

<u>Anti-D should be administered as soon as possible after sensitising event, ideally within 72 hours.</u> Dose offered within ten days may provide protection.

\*\* Anti-D can be ordered from Dorevitch/Blood Bank at Frankston Hospital Level 3 (9784 7047) on any pathology form but form MUST state
